ENERGY 05

Choline

Nutrient used to make cell membranes and acetylcholine; the "C" in MIC blends, as choline chloride

CLASS Nutrient

STUDIED FOR No studies found for energy or fat loss

HUMAN EVIDENCE No human studies found for this use

US STATUS Not FDA approved for energy or weight loss

STUDIED FOR

No published studies. No published human study of injected choline, alone or in MIC blends, for energy or fat loss was found.

HOW IT WORKS IN THE BODY

Choline → Membranes, ACh → MIC blends → Effect unknown

- Used to make **cell membranes** and the nerve messenger **acetylcholine**
- The **"C" in MIC** (methionine, inositol, choline) injections
- **In people,** a mechanism for energy or fat loss is not established

EVIDENCE & WHAT'S KNOWN

EVIDENCE

LAB OR ANIMAL
LEVEL 1 OF 5

- No human study of choline injections found
- No study of MIC blends for energy or fat loss
- Lab and animal work not reviewed for this use

NOT YET ESTABLISHED

- Any effect of injections
- Side-effect profile
- Half-life in people
- Dose in people

QUICK PRACTICAL INFO

HALF-LIFE Not established in people

ROUTES STUDIED Not established (no injection studies)

PHARMACOKINETICS Not established

SOLD AS Compounded (Rx) MIC and lipotropic blends; not FDA approved

MONITORED IN TRIALS Not established (no trials)

SPORT (WADA) Not on the 2026 list

REGULATORY

FDA Only approved form: Choline C 11, a PET scan agent

FDA Choline chloride: 503A and 503B review (Category 1)

WADA Not listed; IV over 100 mL per 12 h banned (M2.2)
