LONGEVITY 07

Epitalon

Synthetic 4-amino-acid peptide (Ala-Glu-Asp-Gly), based on a cattle pineal gland extract

CLASS	STUDIED FOR	HUMAN EVIDENCE	US STATUS
Peptide	Melatonin, telomeres, lifespan	Very small human studies	Not FDA approved · compounding allowed

STUDIED FOR

- **Melatonin** — HUMAN + ANIMAL
- **Retinal degeneration** — HUMAN + ANIMAL
- **Telomeres** — ANIMAL
- **Lifespan and tumors** — ANIMAL

Mostly one research group. Most studies come from one group in St. Petersburg, Russia. FDA found three studies in people and none that assessed safety.

HOW IT WORKS IN THE BODY

Epitalon ▶ Telomerase ▶ Telomere length ▶ Melatonin rhythm

- **Switched on telomerase** and lengthened telomeres in human fetal lung cells (lab)
- **Raised evening melatonin** in old monkeys; not in young ones
- **How it changes melatonin** is unknown
- **In people,** the mechanism is not established

EVIDENCE & WHAT'S KNOWN

EVIDENCE

CASE REPORTS
LEVEL 2 OF 5

- 3 small human studies, mostly from Russia
- No human safety data
- Mouse, rat, monkey and cell studies

NOT YET ESTABLISHED

- Safety in people
- Half-life in people
- Cancer risk (2-year studies)
- Effects of the injected route

QUICK PRACTICAL INFO

HALF-LIFE	ROUTES STUDIED
Not established in people	Under-the-tongue spray; injection beside the eye
PHARMACOKINETICS	**SOLD AS**
No human data (FDA)	Compounded (Rx) or "research use only"
MONITORED IN TRIALS	**SPORT (WADA)**
Melatonin breakdown product in urine, clock genes	Not named on the 2026 list

REGULATORY

FDA	Not approved
HHS	Compounding allowed, acetate, SC or IM (Oct 2026)
WADA	Not named; S0 bans unapproved substances
