TRT 08

Fadogia agrestis

Stem of a West African shrub (also classified as Vangueria agrestis) used in traditional medicine

CLASS	STUDIED FOR	HUMAN EVIDENCE	US STATUS
Plant extract	Testosterone, sexual behavior	Lab or animal only	Dietary supplement · not an approved drug

STUDIED FOR

- **Testosterone** — ANIMAL
- **Sexual behavior** — ANIMAL
- **Testes** — ANIMAL
- **Erectile markers** — ANIMAL

No published human studies found. Research is in rats, mostly from one group in Nigeria. 5 of 17 supplements tested had none of the plant's marker compounds.

HOW IT WORKS IN THE BODY

Stem extract ▶ Testes ▶ Testosterone ▶ Sexual behavior

- **In rats,** blood testosterone and mating measures rose over 5 days
- **In rats,** 28 days changed testicular, liver and kidney measures
- **In people,** the mechanism is not established

EVIDENCE & WHAT'S KNOWN

EVIDENCE

LAB OR ANIMAL
LEVEL 1 OF 5

- Rat studies only, 2005 to 2023
- No human studies or registered trials found
- Rat toxicity signs in testes, liver, kidney

NOT YET ESTABLISHED

- Any effect in people
- Safety in people
- Half-life in people
- Drug interactions

QUICK PRACTICAL INFO

HALF-LIFE	ROUTES STUDIED
Not established in people	Not studied in people (by mouth in rats)
PHARMACOKINETICS	**SOLD AS**
Not established	Dietary supplement; not FDA reviewed before sale
MONITORED IN TRIALS	**SPORT (WADA)**
No human trials; rat studies measured testosterone, organs	Not on the 2026 list

REGULATORY — FDA: No approved drug; sold as dietary supplement | WADA: Not listed
