LONGEVITY 09

Fisetin

Flavonoid, a plant pigment found in some fruits and vegetables

CLASS	STUDIED FOR	HUMAN EVIDENCE	US STATUS
Flavonoid (dietary supplement)	Senescent cells, frailty, bone	Small human studies	Dietary supplement · not FDA approved

STUDIED FOR

Body weight	Bone turnover	COVID-19
HUMAN	HUMAN	HUMAN

Frailty	Senescent cells
HUMAN	ANIMAL

Most results are unpublished. Several completed trials posted results on ClinicalTrials.gov without a journal paper. The Mayo frailty trials have posted no results.

HOW IT WORKS IN THE BODY

Fisetin ▶ Senescent cells ▶ Cells cleared ▶ Tissue aging

- **Senolytic** in a lab screen: killed senescent (old, damaged) cells
- **Lowered senescence markers** and extended lifespan in mice
- **In people,** removal of senescent cells is not established

EVIDENCE & WHAT'S KNOWN

EVIDENCE

SMALL HUMAN
LEVEL 3 OF 5

- Small pilots, mostly Mayo Clinic
- One published randomized trial, 60 men
- Lifespan data are from mice

NOT YET ESTABLISHED

- Long-term safety
- Half-life in people
- Effect on aging in people

QUICK PRACTICAL INFO

HALF-LIFE	ROUTES STUDIED
Not established in people	By mouth (capsules)
PHARMACOKINETICS	**SOLD AS**
Not established in people	Dietary supplement
MONITORED IN TRIALS	**SPORT (WADA)**
Walk distance, bone and inflammation markers	Not on the 2026 list

REGULATORY

FDA	Not approved as a drug
FDA	Supplements not reviewed before sale
WADA	Not listed
