LONGEVITY 03

Glutathione

Tripeptide (three amino acids) made by the body; acts as an antioxidant in cells

CLASS	STUDIED FOR	HUMAN EVIDENCE	US STATUS
Tripeptide	Parkinson's, heart attack, skin color	Small human studies	Not FDA approved · 503A Category 1

STUDIED FOR

- **Parkinson's disease** — HUMAN
- **Heart attack** — HUMAN
- **Skin lightening** — HUMAN
- **Oxidative stress** — ANIMAL

Not tested for aging in people. No study has tested injected or nasal glutathione for aging or longevity in people.

EVIDENCE & WHAT'S KNOWN

EVIDENCE

SMALL HUMAN
LEVEL 3 OF 5

- Small randomized trials, 21 to 50 people
- Nasal Phase IIb: not better than placebo
- None measured aging

NOT YET ESTABLISHED

- Long-term safety
- Half-life in people
- Effect on aging in people

HOW IT WORKS IN THE BODY

Glutathione ▶ Antioxidant ▶ Oxidative stress ▶ Cell protection

- **Antioxidant** made by the body that helps protect cells from oxidative stress
- Its antioxidant role is established in **cell and animal** biology
- **In people,** effects of injected or nasal glutathione on aging are not studied

QUICK PRACTICAL INFO

HALF-LIFE	ROUTES STUDIED
Not established in people	IV infusion; nasal spray
PHARMACOKINETICS	**SOLD AS**
Limited human data	Compounded (Rx), 503A Category 1
MONITORED IN TRIALS	**SPORT (WADA)**
Disease scores, adverse events, blood chemistry	Not on the 2026 list; IV over 100 mL per 12 h prohibited (M2.2)

REGULATORY

FDA	Not approved; 503A Category 1 (under evaluation)
FDA	Supplement-grade glutathione not for IV (Aug 2026)
WADA	Not listed; IV limit applies (M2.2)
