LONGEVITY 01

NAD+

Coenzyme found in every living cell (nicotinamide adenine dinucleotide), made by the body from vitamin B3

CLASS	STUDIED FOR	HUMAN EVIDENCE	US STATUS
Coenzyme	Heart pumping, NAD+ blood levels	Controlled trials (heart disease, China)	Not FDA approved · 503A Category 1

STUDIED FOR

Heart pumping	NAD+ levels	Energy metabolism	Sense of smell
HUMAN	HUMAN	ANIMAL	ANIMAL

Not tested against aging in people. No study has shown that injected or nasal NAD+ slows aging in people. The two controlled trials were in heart disease.

HOW IT WORKS IN THE BODY

NAD+ ▶ Coenzyme ▶ Energy metabolism ▶ Cell function

- **Coenzyme** that enzymes use to move electrons in energy metabolism
- **Used up** as a raw material by other enzymes
- Most NAD+ biology comes from **cell and animal** research
- **In people,** effects of injected or nasal NAD+ are not established

EVIDENCE & WHAT'S KNOWN

EVIDENCE

CONTROLLED TRIALS
LEVEL 4 OF 5

- 2 randomized trials in China, heart disease, not aging
- IV pilot in 11 men; chart review of 14
- No human study of nasal NAD+

NOT YET ESTABLISHED

- Long-term safety
- Half-life in people
- Effect on aging in people
- Nasal use in people

QUICK PRACTICAL INFO

HALF-LIFE	ROUTES STUDIED
Not established in people	IV infusion; no human study of nasal spray
PHARMACOKINETICS	**SOLD AS**
IV: cleared from blood quickly for the first 2 hours (pilot)	Compounded (Rx), 503A Category 1
MONITORED IN TRIALS	**SPORT (WADA)**
NAD+ in blood and urine, liver tests, heart pumping (LVEF)	Not on the 2026 list; IV over 100 mL per 12 h prohibited (M2.2)

REGULATORY

FDA	Not approved; 503A Category 1 (under evaluation)
FDA	Food-grade NAD+ not for sterile IV use (Oct 2024)
WADA	Not listed; IV limit applies (M2.2)
